

**Bourgeoisie** does not have a Chinese translation, so it cannot be picked as an anchor word even if it is the farthest word from the convex hull.

**大都會 (dà dūhùi)** is the point farthest away from the Chinese convex hull, but its translation **cosmopolitan** is too close to the English convex hull, thereby eliminating them as anchor word choices.

**Forest** and its translation **森林 (sēnlín)** are not the furthest points from their respective convex hull, but neither are too close. So, they are chosen as the next anchor words.
